Oakland, CA 94612

**LENNAR MARE ISLAND, CHARACTERIZATION AND CLEANUP ACTION,  
BUILDING 529, DATED JUNE 30, 2004**

Dear Mr. Morris:

The Department of Toxic Substances Control (DTSC) has reviewed a report documenting the cleanup actions for polychlorinated biphenyls (PCB) for the Building 529 area and anticipates that no further investigation or remediation of PCB compounds will be necessary. The final certification that no further action is necessary is expected to be issued at the time of approval of the report of implementation of remedial activities for the H2 Investigation Area. A memorandum concerning our review of the report titled, "Site Characterization and Cleanup Action for Polychlorinated Biphenyls at Building 529, Investigation Area D1, Mare Island, Vallejo, California," dated June 30, 2004, is attached.

Should you have any questions regarding this letter, please contact me at (510) 540-3759.

Sincerely,

Henry Chui, P.E.  
Remedial Project Manager  
Office of Military Facilities
